

Get the right ducting for your dust collection system

Nordfab experts have the experience and high quality ducting required for EV component manufacturing facilities.

The Right Ducting

Nordfab's Quick-Fit® clamp-together ducting is installed in hundreds of thousands of industrial and commercial air filtration and dust collection applications, including battery assembly plants. Quick-Fit offers these benefits:

- Sustainability / re-use —ductwork can be easily unclamped and relocated as facility requirements evolve
- Quick and easy installation, resulting in cost savings during installation
- Easy cleanouts
- Sealed duct system prevents leakage, resulting in energy savings and perfect performance

The Right Expertise

Nordfab introduced Quick-Fit clamp-together ductwork, with its unique rolled edge ends and easy-to-use clamps, in 1990. As well as being the originator, Nordfab is the industry leader, and the world's largest manufacturer of clamp-together ducting for industrial ventilation, with capability of producing 3500 pipes per day.

The Right Resources

For facility designers and engineers, Nordfab offers:

- Industry-standard product specifications—MasterSpec (AIA), ARCAT, SpecLink
- Installation design applications—CAD plug-in, online 3D design tool
- Our own experienced installation design team and expert dealer support across the globe

Our capabilities include:

- Ducting produced in our ISO-certified and process-oriented manufacturing environment
- Largest volume of stock ready to ship
- Fast order fulfillment for both stock and custom ductwork

Made in the USA

The world's fastest industrial ducting™
