## Y Branch

## **Ordering Information**

- When ordering, specify material, gauge (if nonstandard), dimensions A, B, C, end types, and angle (standard 60°, optional 90°).
- Both B & C each must be at least 50% of A, with B or C being at least 80% of the opposite leg.
- Flange Leg: Length = 4.5" Height = A + 4"

#### 14 Gauge Y Branches:

• Any Branch with B, or C end smaller than 8" will be hybrid. (Smaller section will be a lighter gauge.)

#### Construction

Seam: Longitudinal seam is lapped, spot welded, and caulked on standard gauges. 14ga and 12ga - Solid butt welds.

Collars: Located on the exterior side of each port and considered as air flow non-directional. Collars have a laser welded longitudinal seam. If airflow directional product is required, it must be stated on the PO and additional cost may be incurred. A raised lap seam and spot weld are used for attaching the collar to the body and no caulking is used. If caulking is required, additional cost may be incurred.

14ga and 12ga - Collars have a plasma welded longitudinal seam.

#### **Optional End Types**

Standard QF end can be changed to Raw ID (RI), Raw OD (RO), No Fitting (NF), Hose Adapter (RF), Flat Flange (FFL), Angle Flange (AFL), or Van Stone (VS).
