

Mark your calendar for Nordfab University

Each Nordfab University graduate will:

- Gain understanding of basic dust collection system design. Even those who have a good knowledge of system design will learn from some shortcuts.
- Gain knowledge of how to use Quick-Fit Visual®, Quick Tick Online™, NordCAD™, and Quick Solutions Online™ — all the tools we've developed to speed the design, quoting and sales process.
- Learn the basic features and benefits of each QF component.
- Understand how to develop a custom QF sales presentation for various customer groups (end users, engineers, contractors, OEMs, etc.).
- Gain first-hand installation experience.
- Experience a great opportunity to network with peers.

In order to ensure that all students get the attention required, each session of Nordfab University is limited. We expect demand for classes to outnumber the available slots, so please return this page as quickly as possible to ensure your accommodation.

Attending Nordfab University (or sending your employee) helps ensure your future success selling Nordfab products.

Nordfab University Registration Request

We anticipate Nordfab University sessions will fill quickly. We will make every effort to accommodate all requests for admittance; but completion of this form does not automatically reserve a class position. Please do not make any reservations until we have verified your placement.

Nordfab will pay for meals, two days lodging, transportation from the hotel to our facility, and all instructional materials. Dealers are expected to arrange transportation to Thomasville, NC. We will make your hotel arrangements at a nearby hotel.
