

Nordfab Now® is a program intended to provide our Quick-Fit® ducting products faster — to reduce the time between order placement and product shipment. Customers placing orders for Nordfab Now designated ductwork, which means standard items needed for most typical installations, can expect their order to ship the next business day after order placement.

Nordfab Now = breadth and depth. A broad range of items and a sufficient quantity of those items.

**Breadth - 900 of our most commonly ordered items**  
**Depth - two weeks inventory for each item**

When you need ducting now...we've got you!

**You can now order Nordfab Now designated ductwork using our online portal, QTO.**

When Nordfab Now is fully implemented, customers will be able to create Nordfab Now designs using our award-winning installation design software, Quick-Fit Visual®.

Benefits of Nordfab Now include:

- Our extensive inventory allows us to be faster when you need a custom item, giving us more time for designing and building what you need.
- If you need additional parts during an installation, these can now be very quickly provided upon request, reducing risks of long downtime during an install.
- When you need a replacement item, it can be quickly shipped, likely reducing operational shutdown time.
- Shipping expenses may be reduced; orders which previously may have required next day shipment can be shipped second day.
- Everyone likes fast shipments. (We have all been spoiled by next day delivery of our favorite consumer products, right?)

Nordfab has always been known for FFR:  
*Fast, Friendly and Reliable*

With Nordfab Now, we will be faster, friendlier, and more reliable than ever.
