710	709	707	10	0,9

$L_1 = (\text{Ø}_B \times 2) + 206$
 $L_2 = (\text{Ø}_B / 2) + 58$
 Ø_C must be smaller than or equal to Ø_A
 Ø_B must be smaller than or equal to Ø_C
 Ø_D must be smaller than or equal to Ø_C

Temperature Rating of Product Components		
° C	Double Branch	Sealants
200°	Galvanised Steel	Joka Seal Metal Sealant 2315
121°		
-20°		

Compliance / Rating of Product Components		
Product	Material	Compliance / Rating
Double Branch	Galvanised	DX51D with Z275 Coating
Joka Seal Metal Sealant 2315	Acetone blend	AAMA Specification 801.1

Additional Notes

At temperatures ranging between 200° C and 250° C, the zinc-iron alloy layers in galvanised steel will continue to provide a high level of protection from corrosion. However, there may be some peeling, changes in mechanical properties, and reduction in the corrosion protection. Recommended max. service temperature is 200° C.

Ends

Standard QF end can be changed to Raw ID (I/D), Raw OD (O/D), Hose Adapter (FX), Flat Bar Flange (FL), or 6mm turned out edge (FB).

Construction

Seam: longitudinal seam is lapped, spot welded, and caulked.

Collars: located on the exterior side of each port and considered as air flow non-directional. Collars have lapped, spot welded and caulked longitudinal seam.

If air flow directional product is required, it must be stated on the PO and additional cost may be incurred. A raised lap seam and spot weld are used for attaching the collar to the body and no caulking is used. If caulking is required, order QF Double Branch.
